No. 8238A.—7th July 1930.—Whereas the validity of the election of Babu Satish Chandra Ray Chaudhuri by the Mymensingh East (Non-Muhammadan) Constituency as a member of the Bengal Legislative Council has been brought in question by an election petition duly presented by Maharaja Shashi Kanta Acharyya Chaudhuri, of Muktagacha, Mymensingh, under the provisions of Part VII of the Bengal Electoral Rules;

(3) to direct that the respondent Babu Satish Chandra Ray Chaudhuri shall pay to the petitioner the sum of Rs. 50 on account of issue No. 1 in the case, and

W. S. HOPKINS,

Chief Secy. to the Govt. of Bengal.

Report.

In the Court of the Commissioners appointed under rule 36 (2) (a) of the Bengal Electoral Rules.

In the matter of the election petition of Maharaja Shashi Kanta Acharyya Chaudhuri, petitioner,

versus

(1) Satish Chandra Ray Chaudhuri, (2) Rai Bahadur Umesh Chandra Chakladar and (3) Padmini Mohan Neogy, respondents.

Present:

A. G. R. Henderson, Esq., I.C.S., President.
Diwan Bahadur Sarada Prosad Sen, Commissioner.

Babu Ashutosh Ghosh, Commissioner.

This petition has been filed by the Maharaja Shashi Kanta Acharyya Chaudhuri of Mymensingh. His nomination papers were rejected by the Returning Officer at the scrutiny. The only other candidate was the contesting respondent No. 1 Babu Satish Chandra Ray Chaudhuri who was declared to be duly elected.

At the framing of issues the question was raised whether before the petitioner signed the nomination paper there was a discussion, in the course of which certain gentlemen requested him to stand for the Mymensingh East Non-Muhammadan constituency, and he agreed to this proposal. At the time we entertained

some doubt as to the relevancy of this, and decided that special costs would be placed upon this issue. The case of the petitioner is that there was such a conversation: on the other hand, the contesting respondent maintains that the story was subsequently concocted for the purpose of this case. The learned Advocate who appeared for the respondent has failed to satisfy us that it makes the slightest difference whether such a conversation took place or not.

Provided that the nomination paper was properly filled in and filed, it does not matter whether there was a previous conversation between the candidate and some of his supporters, in the course of which he was asked to stand for the constituency. The question of fact raised in this issue is therefore quite irrelevant and we leave it undecided.

The case turns upon the question whether the Returning Officer acted correctly in rejecting the nomination papers filed on behalf of the petitioner. In this connection we wish to refer to the provisions of rule 11 (3) of the Bengal Electoral Rules, 1926. Before the Returning Officer can find that a candidate is qualified to stand for election he must have presented to him a nomination paper completed in the form prescribed in schedule III. There must be a duly qualified proposer and seconder and the nomination must be for a definite constituency. In the second place, there must be a declaration subscribed by the candidate himself assenting to the nomination.

In the present case two nomination papers were filed (Exhibit 2 and Exhibit 7). We can dispose of the latter in a few words. The declaration was not subscribed by the candidate himself but by his Ammuktair Babu Sasanka Mohan Ghosh. The validity of this in no way depends upon whether it was done at the suggestion of the petitioner's legal advisers because they entertained doubts as to the validity of Exhibit 2. In our opinion this declaration must be subscribed by the candidate himself, and we are not prepared to accept the contention of the petitioner that this can be done by an agent.

The Returning Officer rejected the nomination paper (Exhibit 2) on the ground that it was signed by the candidate before there was an actual vacancy. This ground was supported before us on behalf of the respondent, but not by the learned Government Pleader who appeared on behalf of the Advocate-General. The rules provide a date after which a nomination paper cannot be filed, but they do not provide any date before which it cannot be completed. If there were such a date it would lead to difficulties. The learned Advocate who appeared for the respondent had great difficulty in deciding whether he would select the date on which the vacancy occurred or the date of the notification as the one before which no nomination paper could be filled in: there is really no logical reason for selecting either of them. On the whole we are of opinion that there is nothing to prevent a nomination paper from being filled up before the existence of a vacancy, and we think that this was the view taken by the Commissioners who heard the election petition of Rai Prasanna Kumar Das Gupta Bahadur *vs.* Mr. C. R. Das. See *Hammond Indian Election Petitions, 1925, Volume II, page 185.*

In dealing with this point we must emphasise again that it is necessary for the candidate to subscribe a declaration that he accepts the nomination, and in the present case we are not satisfied that this was done. The petitioner signed his name on Exhibit 2, which was otherwise blank, before leaving for Europe. The name of the constituency was not filled in and the nomination paper might have been used for any constituency in the province. It is impossible to infer from a mere signature on a blank paper that he accepted the proposal to stand for this constituency. That he did not do so is apparent from the fact that his friends thought it necessary to cable to him on the subject. If, in fact, there had been any definite acceptance, it would not have been necessary to send any cable at all. Apart from this the only evidence to show that the nomination was accepted consists of a cable sent by the petitioner (Exhibit 5), which is in these terms "Prefer East. Consult friends. Else Dacca." Whatever this may mean exactly, it certainly does not mean that the nomination for this constituency was accepted: there was still a doubt in the mind of the petitioner and he thought consultation amongst his friends advisable. We have no evidence to show that as a result of this consultation the matter was put before him again and that he accepted the nomination. The person in the best position to prove this acceptance would undoubtedly be the petitioner himself and he has not come forward to give any evidence. We, therefore, find it quite impossible to hold that he ever agreed to the nomination (Exhibit 2). As we are not satisfied that he agreed to the nomination we are of opinion that the paper was properly rejected.

This is sufficient to dispose of the case and it is not necessary to enter into the other questions raised. In our opinion, Babu Satish Chandra Ray Chaudhuri was duly elected and the petition should be dismissed.

With regard to costs the petitioner, having failed, should pay costs to the contesting respondent: the contesting respondent should pay the petitioner costs on account of the issue which was improperly raised. The petition raised an important question of law and we required the assistance of the learned Government Pleader acting under the instructions of the Advocate-General. We derived material assistance from his argument and we consider that the petitioner should pay his costs.

We note our detailed recommendation as to costs—

To be paid by the petitioner to the respondent Babu Satish Chandra Ray Chaudhuri a consolidated sum of Rs. 150 for the whole case.

To be paid by Babu Satish Chandra Ray Chaudhuri to the petitioner on account of issue No. 1 Rs. 50.

To be paid by the petitioner to Rai Sarada Charan Ghosh Bahadur, acting under the instructions of the Advocate-General, Rs. 300.

CALCUTTA, THE 8TH JULY 1930.

RESOLUTION—No. 3395 Com.

The Government of Bengal have had under consideration certain practical difficulties that have arisen in connection with the grant of licenses to supply electricity under the Indian Electricity Act, 1910, and the subsequent successful working of the licensed undertakings. Having in view the interests of the public as well as those of the applicants themselves, Government have decided *inter alia* that in future no application for a license will be proceeded with until the applicant has been able to satisfy Government regarding (a) his ability either to provide or obtain adequate finance on terms which will not militate against the successful running of the undertaking, (b) his ability to evolve a practicable scheme and put it into operation under competent technical supervision, and (c) his intention to maintain a substantial interest in the undertaking after it has been started.

These conditions will not preclude the conversion of an undertaking into a limited liability company, but the Memorandum and Articles of Association of any such proposed company will be subject to scrutiny by Government before the transfer of a license to a company is sanctioned.

Intending applicants are accordingly advised to approach Government in the first instance with satisfactory evidence of financial stability or prospects before incurring the expense of preparing a draft license and publishing it, or preparing a detailed scheme.

ORDER.—Ordered that this resolution be published in the *Calcutta Gazette* and that copies be supplied to the Press.

By order of the Governor in Council,

E. N. BLANDY,

Secy. to the Govt. of Bengal.

IRRIGATION DEPARTMENT.

NOTIFICATIONS.

[Third publication.]

No. 5T.I.—2nd June 1930.—In exercise of the powers conferred on him by sections 78 and 99 of Act III (B.C.) of 1876, the Governor in Council proposes to pass the following rules and fix the undermentioned rates to be charged for water supplied from the Bakreswar Canal in the Birbhum district.

2. Notification No. 2-I., dated the 1st April 1930, on the subject published in the *Calcutta Gazette* in its issue of the 17th April 1930, and three successive issues, is hereby cancelled:—

Leases for a term of years.

1. The country served by the canals shall be mapped out into blocks of convenient size in accordance with the features of the ground, natural or artificial. So far as may be practicable, the blocks shall be separated by drainage lines. This shall be done by the Subdivisional Canal Officer under the guidance and control of the Divisional Canal Officer.

2. Each block determined as above shall be numbered and recorded with its gross and irrigable areas in registers to be maintained by the Subdivisional Canal Officer. The blocks shall also be marked on maps to be maintained by the same officer.

3. Leases for not more than seven years may be granted for the whole irrigable area of a block or for definite parts of a block under the following conditions:—

I. Ordinarily the whole irrigable area of any village so far as situated within the block must be included in the lease. If the lands of a village within the block are divisible into two or more distinct parts which can be irrigated independently, a separate lease may be granted for each part.

II. All leases within one block shall be so granted that they may expire on the same date.

III. No lease shall be granted when the supply of water must of necessity be delivered across an unleased area, unless a channel exists, which in the opinion of the Subdivisional Canal Officer, will deliver water without waste across the unleased area.

4. The Superintending Engineer shall fix from time to time the gross area for which and the limits of the canal within which, leases for a term of years may be granted.

5. Maps of all villages in which lands have been brought under lease for a term of years, or in which there is any probability of such leases being taken, shall be kept in the Subdivisional Canal Office. These maps to be at scale 32" = 1 mile when such are available, and elsewhere at scale 16" = 1 mile.

6. The preliminary application for a lease for a term of years, either new or renewal, may be of an informal nature, but it must be in writing. It may be presented and shall be received either at the Subdivisional or Sectional Canal Office; in the latter case the Sectional Officer shall forward it immediately to the Subdivisional Canal Officer. The Subdivisional Canal Officer as soon as he has, by personal enquiry or by an enquiry made by the Sectional Officer, satisfied himself that the land

in question constitutes a definite block or a definite part of a block, and that it can be irrigated, shall at once inform the Divisional Canal Officer giving such particulars as that officer may direct, and shall ask his formal approval to the lease being proceeded with. The lands to be brought under lease shall be indicated on a copy of the map alluded to in rule 5.

7. On receipt of such approval the Subdivisional Canal Officer shall depute an amin to prepare the *khassra* or detailed assessment paper. This shall be done on the ground with the aid of the revenue survey map and *khassra*. Should the survey map and *khassra* not be available, the amin shall make a sketch map, and shall measure the areas of the holdings with a chain or measuring-rod.

8. When the amin has completed the *khassra*, the Subdivisional Canal Officer shall forward it to the Divisional Canal Officer for approval.

9. As soon as the *khassra* has been approved by the Divisional Canal Officer, he shall return it to the Subdivisional Canal Officer endorsed with his signature in token of approval.

The Subdivisional Canal Officer shall then prepare a *khatian* or abstract of the *khassra*, and shall have the form of application, given as Appendix No. I to these rules, filled up and signed or marked by each of the applicants, in the presence of two witnesses.

When the application has been completely signed, the Subdivisional Canal Officer shall send it to the Divisional Canal Officer, by whom the permit or formal approval of the lease shall be signed and issued in the form given as Appendix No. III to these rules. The permit shall be made over to the representative of the cultivators by the Subdivisional Canal Officer by means of his Sectional Officer.

10. Should it happen that the cultivators of the block proposed for lease are not unanimous, and that certain of them decline to sign the application, the Subdivisional Canal Officer shall report the matter to the Divisional Canal Officer and shall hold a local enquiry, recording the statements of the persons who decline to sign and recording his personal opinion on the reasons given. He shall then send a report to the Divisional Canal Officer, who shall decide whether the lease may be accepted excluding the fields in the occupation of the persons who decline to sign, or whether the lease shall be declined. The Divisional Canal Officer is authorised to grant a lease when not less than 95 per cent. of the net irrigable area of the block has been signed for. In particular cases should it be desirable to grant a lease even though an area larger than 5 per cent. of the block has not been signed for, this may be done on the written order of the Superintending Engineer. The reasons for granting the lease shall be fully recorded.

Covering Leases.

11. Applicants for a lease for a term of years who may require water before the lease has been concluded can obtain a supply on tendering an application for a covering lease in the form given as Appendix No. II to these rules. This application must be signed in the presence of the tahsildar or of some other responsible officer nominated for the purpose by

the Subdivisional Canal Officer. The signatures should be those of the leading cultivators in the block in question and they should represent holders of not less than 75 per cent. of the irrigable land within the block.

As soon as the Subdivisional Canal Officer receives the application duly signed, he shall issue a permit in the form given as Appendix No. IV to these rules, and shall at once supply water.

Season Leases.

12. Applications for water to irrigate spring rice or other crops between the 16th November and 15th June, may be presented at the Subdivisional Canal Office or to the Sectional Officer. They must be in the form given as Appendix No. V to these rules.

In the applications the areas for which water is required must be specified but the rate will be charged on those areas for which water is actually used as determined by measurement.

The permit in the form given as Appendix No. VI to these rules will be granted by the Subdivisional Canal Officer if he is able to supply the water.

Supply of water.

13. The Divisional Canal Officer shall control the supply of water throughout the Division in his charge.

14. No water shall be supplied to any lands except such as have been brought under a lease for a term of years or for the season, or to such as are provided for by a covering lease.

15. Under the forms of irrigation lease in use, no specific supply of water is promised; but the undertaking is to give such a supply to each lessee as may be necessary for the lands leased. The supply shall be given, as may be required for the proper cultivation of the crops under irrigation, according to the exigencies of the season.

16. The Divisional Canal Officer is empowered to give the required supply by rotation should this be advisable for the efficient working of the canals in his charge. In such a case, he is required to give the lessees written notice informing them of the periods when they will be supplied with water.

Collection of water-rates.

17. The rates due for water supplied shall be collected by the Subdivisional Canal Officer through his staff of tahsildars and peons. All *khatians* or demand statements shall be signed by the Subdivisional Canal Officer after scrutiny in his office.

18. At the time of preparation of the *khatian* in the Subdivisional Canal Officer's office, each person assessed shall be furnished with an extract from the assessment paper, showing the particulars of the charge against him. This extract shall be furnished in such form as may from time to time be approved for the purpose.

19. Each person on paying the sum due from him shall be given a receipt in the form prescribed for the purpose.

20. In regard to any proceedings taken under the Public Demands Recovery Act the Divisional Canal Officer is subject to the control of the Collector of the district.

Unauthorized use of water and waste of water.

21. Should it be necessary to take action under the provisions of sections 79 and 80 of the Act, proceedings shall be instituted only under the direct and special order of the Divisional Canal Officer. The primary record of the facts regarding the unauthorized use or the waste of water shall be made by the Subdivisional Canal Officer and his subordinates. The parties whom it is proposed to assess shall be informed in writing, and shall be called on to show cause why they should not be assessed. The record of their statements shall be made by the Divisional or by the Subdivisional Canal Officer. The Divisional Canal Officer shall consider the facts and statements recorded, and shall in deciding the case give his reasons for or against assessment, both as regards the facts and as regards the law; and he shall determine the rate to be charged, subject to the provision in the schedule of rates attached to these rules.

22. Should the Divisional Canal Officer decide on making an assessment, he shall have the assessment papers prepared by the Subdivisional Canal Officer and his staff. Each person assessed shall be furnished with a statement of the charge against him, and an abstract of the demand or *khatian* shall be sent to the Subdivisional Canal Officer, who shall proceed to recover the sums assessed. The period of one month within which an appeal may be presented to the Collector under section 91 of the Act shall count from the date on which the statement of the charge is furnished to the person assessed, which date shall be endorsed on it.

23. No proceedings shall be instituted if the unauthorized use or the waste of water have occurred through the act or neglect of a Canal Officer or subordinate employed on the canal. During the irrigation of autumn rice, the passing on of surplus water from leased to unleased fields is not an unauthorized use of water.

Complaints and Applications.

24. All complaints or applications with respect to the supply of water, to defective drainage, and generally with respect to the administration of the canal, shall be received on presentation at either Divisional or Subdivisional Canal Offices.

Complaints and applications received by a Divisional Canal Officer may be transferred to his Subdivisional Canal Officers for disposal at his discretion.

25. Complaints or applications with respect to corrections of the assessment, with respect to the actions of the amins in assessing, and with respect to the actions of the tahsildars and other staff employed in collections, shall be received at the office of the Divisional Canal Officer.

26. Receipts in the prescribed form shall be given at all offices for complaints or applications presented. The receipt of all complaints and applications shall be recorded in registers to be kept for that purpose.

27. The officer receiving the complaint or application shall either make a personal enquiry into the matter or he shall nominate in writing some responsible person to hold the enquiry.

28. The orders passed on all complaints or applications shall be in writing and a copy of every order shall be furnished to the complainant or applicant.

The copy of order may be sent by post (registered), if this is convenient.

The period within which an appeal may be presented under section 91 of the Act shall be reckoned from the date on which the copy of the order is received by the person.

29. When an appeal to the Collector is from the order of a Subdivisional Canal Officer, the proceedings shall be called for through the Divisional Canal Officer, who may record on them such remarks as he may think desirable, provided that he does not thereby detain the proceedings.

In all cases in which an appeal against an assessment is preferred to the Collector, that officer may, if he thinks fit, direct that the collection of water-rates be suspended till the appeal is heard.

30. The Divisional Canal Officer is empowered to revise the proceedings of his Subdivisional Canal Officers, and the Superintending Engineer is empowered to call for and to revise the proceedings of all officers under his control.

Remissions and Alterations of Demand.

31. Whenever the crop on land entitled to a supply of water suffers material injury from an insufficient supply of water, or from any interruption in the supply of water, remission of the rate due on such crop shall be given in whole or in part by the Divisional Canal Officer, provided that the person claiming remission shall have applied for such not less than 15 days before the reaping of the crop.

32. On the occasion of lands being brought under a lease for a term of years, the Divisional Canal Officer is empowered to remit the rates for the first season on those fields which from the nature of the cultivation then obtaining, or from other causes, have not, in that season, derived any benefit from the supply of canal water.

33. Should the crop on lands under lease for a term of years suffer material injury from excess of water due to deficient drainage the Divisional Canal Officer may grant remission of the rates due on such lands in whole or in part, provided that the person asking for remission shall have applied at least 15 days before the reaping of the crop.

34. Revisions of the assessment required in consequence of land under lease being left uncultivated or of land being appropriated for purposes other than cultivation shall be made under the orders of the Divisional Canal Officer.

35. Revisions of the assessment required in consequence of incorrect entries of the names of occupants of lands under lease or of incorrect entries of areas or amounts in the assessment papers, or required by changes in the occupation of lands shall be made under the orders of the Divisional Canal Officer.

36. Remissions of water-rates on account of injury to the crops caused by inundation, by blight, by storms or by any extraordinary cause will only be allowed under the special orders of the Local Government.

Irrecoverable Demands.

37. The Superintending Engineer is empowered to sanction the write-off of those demands which are reported, after due enquiry by the Divisional Canal Officer, as irrecoverable owing to the poverty of the defaulter or of his successors in case of his death, or owing to the defaulter having absconded.

Cultivators' Representatives.

38. Whenever the preliminary application for a lease for a term of years has been approved by the Divisional Canal Officer, the Subdivisional Canal Officer shall select as representative of the cultivators a suitable person or persons who shall generally be acceptable to the cultivators and who shall each have a direct interest in the land for which the lease is executed.

39. The person or persons so selected shall be required to give assistance to the Canal Officers in respect of the following matters:—

(i) In the preparation of applications for leases.

(ii) In the measurement of irrigated lands.

(iii) In recording the names of the occupiers of the holdings.

(iv) In receiving demand statements and distributing to the cultivator the individual notices of assessment.

(v) In attending, when required, at enquiries into complaints.

(vi) In reporting to the Subdivisional Canal Officer any changes in the occupancy of lands under lease.

(vii) In assisting the tahsildar in collecting rates.

40. For such assistance the cultivators' representative or representatives shall be entitled to free irrigation of the lands in his or in their own occupation which may lie within the boundaries of the leased area, subject to a total limit of 3 per cent. of the area assessed. The Divisional Canal Officer may disallow in whole or in part this free irrigation, and may recover the rates which would otherwise have been payable in whole or in part if the assistance specified in rule 39 has not been efficiently rendered. The reasons for such disallowance shall be recorded in writing.

41. The Subdivisional Canal Officer shall maintain in his office a register containing a record of the names of all representatives and of the areas of free irrigation allowed to each.

42. Applicants for season leases shall be required to nominate one of their number who must have a substantial interest in the land to be irrigated as their representative. The representative so nominated shall perform the same duties as stated in rule 39 and shall receive remuneration on the same scale as in rule 40.

Power to decline or cancel leases.

43. Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted or used for the irrigation of lands not under lease, it shall be competent for the Superintending Engineer to direct that the lease shall be cancelled with

effect from the 16th of June next following. The order to cancel a lease shall be passed before the 1st of April of the year in which it is to take effect.

44. The Superintending Engineer may give directions to the Divisional Canal Officer to decline applications for irrigation leases of lands in villages where there has been persistent difficulty in realizing the water-rates, until all arrears have been paid.

He may further suspend, or altogether cancel, any lease for a term of years, if on the 1st June of any year water-rates to the extent of half the demand for one year are in arrears. Previous notice of intention to put this rule in force shall be given not later than the 15th April preceding.

Miscellaneous.

45. Tanks may be supplied with canal-water without charge, when water can be made available without injury to the cultivation dependent on a canal, under the following conditions:—

(i) That the water is to be exclusively used for domestic purposes, or for watering cattle.

(ii) That a channel exists through which water can pass without waste.

(iii) That the water shall only be supplied on the written order of the Subdivisional Canal Officer.

(iv) That any new outlet or sluice which may be required to allow of the supply being given shall be provided at the cost of the persons who ask for the water.

(v) That the supply of water may be stopped at any time if it is found that it is being misused.

46. Except when a public right-of-way exists, no person shall, without the permission expressed in writing of the Divisional or Subdivisional Canal Officer, pass himself, or cause any animal or vehicle to pass, on or across any of the works, banks or channels of a canal, or drainage work which is part of the canal system except by means of such bridges, fords and ferries as may have been provided for the purpose.

Any person who, after due warning, commits a breach of this rule, may be proceeded against under section 93, clause (9), of the Irrigation Act.

47. The use of any part of the banks or berms of any canal, drainage work which is part of the canal system, or flood embankment which is subject to the provisions of the Irrigation Act, as a place for relieving the calls of nature, is prohibited. Any person who after due warning commits a breach of this rule may be proceeded against under section 93, clause (9), of the Irrigation Act.

48. Should water be required for purposes other than irrigation, it may be supplied when available at a rate of one rupee per 10,000 cubic feet of water.

49. No officer employed on the canals, unless especially exempted by the Governor in Council from the operation of this rule, shall have any interest in the distribution of water from any of the canals or purchase or bid for any Government property sold thereon either in his own name or in the name of another, or jointly, or in shares with others.

RESOLUTION—No. 3372Co-op.

Minister-in-charge: The Hon'ble Khan Bahadur
Maulvi K. G. M. Faruqi.

Read--

The Report on the working of the
Co-operative Societies in the
Presidency of Bengal for the
year ending 30th June 1929.

Administration.—Important decisions were taken after the close of the year in the matter of policy relating to the recruitment of the superior controlling staff of Assistant Registrars, and the employment of the subordinate auditing staff of primary societies.

Experience has shown that the arrangement under which the staff of Assistant Registrars has been loaned from the cadre of the Bengal Civil Service, Executive Branch, is not altogether satisfactory. It has also been found necessary to offer an opening to deserving and meritorious officers of the Subordinate Co-operative Service for promotion to the higher service. In 1928 one of these posts was filled by the promotion of a departmental officer. Other two posts have now been excluded from the cadre of the Bengal Civil Service and permanently filled by the selection of two officers—one belonging to that service and another by a member of the Bengal Junior Civil Service—who had served in the department and expressed their willingness to continue in it permanently. It has been decided that future recruitment to these three special posts, when they next fall vacant, will be made by selection of departmental officers. The remaining posts will continue to be filled by members of

the Bengal Civil Service who will stay in the department normally for a period of five years and then revert to their own cadre.

In order to remove the difficulty experienced in carrying out the statutory audit of primary societies owing to deficiency in the strength of the audit staff, Government have decided that, as the receipts from audit fees increase automatically from year to year, there should be a corresponding increase in the number of auditors. In accordance with this principle 60 additional auditors were sanctioned during the last financial year and 53 during the current year.

Necessary instructions have also been communicated to the Registrar as to the procedure to be followed for making provision for the staff required each year. As, however, the liability of Government to meet the cost of the audit staff of societies other than infant and anti-malarial societies must not exceed the receipts from audit fees, it is hoped that the societies from which they are due will realise the importance of punctual payment of these fees.

The Minister-in-charge trusts that with the appointment of the necessary staff for primary audit the Inspectors will now be in a position to devote more of their time to the important duties of propaganda, inspection, supervision and test audit, and above all to pay attention to the work of educating the members in the principles of co-operation on the great importance of which stress has been laid by the Royal Commission on Agriculture. He also expects that the Assistant Registrars will find it possible to get into closer and more frequent personal touch than at present with co-operators in their respective jurisdictions, so that they may have first-hand knowledge of all that should be known and rectify defects on the spot.

2. Progress of the movement.—The Royal Commission has rightly emphasised the vital importance of co-operation to the agriculturist. It goes without saying that this movement is a potential and progressive factor whether in the domain of agricultural finance which furnishes the sinews of material activity, or marketing of agricultural produce or the organisation of agricultural operations on a basis of joint endeavour or rural welfare. It is gratifying to notice that

the Bengal Co-operative Department is fully alive to the importance of an all-round application of co-operative principles for the improvement of the economic and other conditions of the people.

Adverse comment has sometimes been made of the fact that the credit aspect bulks so largely in the movement. But as pointed out by the Royal Commission, experience has amply proved the advantage of this type as a foundation for other forms of co-operation, and there are good reasons why the movement is still predominantly credit in its character. This side of the movement, therefore, needs as much attention as the non-credit side. Although success in co-operation cannot be gauged by figures, and although quality does not necessarily follow from numerical increase, statistics furnish interesting data for a critical study of the movement. The fact that during the year under review the proportion of members of agricultural credit societies to families in rural areas in the province was only 4·7 per cent., taking the number of rural families to be 8,702,000 as estimated by the Royal Commission on Agriculture, goes to indicate that the credit movement has so far been able to touch only a fringe of the rural population. And if the burden of debt of the rural population is to be lifted and their lot improved much patient and up-hill work on the credit side yet remains to be done by the department.

The proportion of average deposit amounting to Rs. 1·9 by an individual member to the average loan of Rs. 37·72 taken by him probably indicates scope for the inculcation of the habit of thrift among the members.

Last but not least is the steady increase of overdue loans which have gradually risen from Rs. 62·45 lakhs or 25·5 per cent. of the total outstandings in 1926-27 to Rs. 118·29 lakhs or 34·4 per cent. in the year under review. This feature has been engaging the attention of Government for sometime past. The increase has been attributed more or less to the unsatisfactory harvests and low price of agricultural produce, particularly of jute, during the last two years; and it has been pointed out that the owned capital of the societies sufficiently covers the entire amount of overdues and the position is well within the margin of safety.

Government in the Ministry of Agriculture however are not convinced that the accumulation of overdue loans could be entirely attributed to adverse agricultural conditions nor can they view with equanimity a situation which may jeopardise the healthy growth of the movement. The year under review was on the whole prosperous, but it is remarkable that the percentage increase of overdues in all the divisions was much higher than in the preceding year, when conditions were far less satisfactory. The causes must, therefore, be looked for elsewhere, and the Registrar should satisfy himself whether they have been due to inherent defects either in the management of the societies, the system of loans or the lack of co-operative education.

Turning to the non-credit side of the movement, Government are pleased to note that a policy of caution is being pursued in the organisation and working of societies and that more attention is paid to the expansion of business of the existing societies and consolidation rather than to the organisation of new societies. Too much stress cannot be laid on the importance of business management of these societies and their expert guidance, since experience shows that these are the essential requirements for ensuring the success of such societies.

Among the societies organised for the marketing of agricultural produce great interest attaches to the jute sale societies; and as pointed out by the Registrar the problems connected with this type of societies are for obvious reasons very difficult and complicated. The fluctuations in the Calcutta market and other speculative elements in the business are factors which render the business risky and uncertain. The financial and other aspects of these societies are now engaging attention.

The remarkable progress made by the co-operative societies for the marketing of milk furnishes an example of the success that can be achieved under expert guidance and advice.

3. Non-agricultural Societies.—

Among this class of societies great interest attaches to the anti-malarial and public health societies, the importance of which in promoting village welfare attracted the attention of the Royal Commission. The League of Nations Malaria Commission made a special

study of the working of the anti-malarial societies during its visit to the province.

The work of village reconstruction societies in Birbhum district under the Rural Reconstruction Department of the Visvavarati at Bolpur and of organisations among women also deserves mention.

The Royal Commission has drawn particular attention to the great opening for co-operative activities in the improvement of village life in order to bring home to the cultivators the value of "better living" which should follow from "better farming." In no field of rural work have co-operative and private organisations a greater opportunity for usefulness than in village uplift. The Minister-in-charge, therefore, trusts that co-operators will set themselves earnestly to the task of improving the lot of the agricultural population who constitute the backbone of the province.

4. Co-operative Finance and the Banking Enquiry Committee.—Particular interest attaches to the work of the Banking Enquiry Committee whose investigations cover a wide field including agricultural credit and credit facilities for allied industries as well as

cognate matters relating to rural banking, marketing, etc. The report of the Committee will be awaited with great interest.

5. Royal Commission.—The more important recommendations of the Royal Commission on Agriculture were considered at the Tenth Conference of Registrars of Co-operative Societies in India held at Simla in September and October 1928. They are now under consideration of this Government along with the resolutions of the Conference. It is worthy of note that the policy underlying the Royal Commission's recommendations is recognised in this Presidency and is generally followed in principle.

6. Acknowledgment. — Government have great pleasure in acknowledging the services rendered by a gradually increasing number of officials and non-officials who spared no pains to assist the growth of the co-operative movement.

The instructions noted below should be observed by Drawing Officers in the preparation of establishment bills and the disbursement of their proceeds:—

(1) The office and fair copies of all monthly pay bills should be totalled by different clerks independently, and the Drawing Officer should note that the totals in both bills agree.

(2) It is not sufficient that the component items of an establishment bill should be checked. The total shown in the bill should also be checked by adding up the items. This should be done by the Drawing Officer, or by a Gazetted Officer before the bill is signed by the Drawing Officer.

(3) The total of an acquittance roll should be checked against the total of the corresponding establishment bill and the money received from the treasury. It should be seen that any difference between the totals is properly accounted for, that every payee has

given a proper quittance and that any undischarged amount is returned to safe custody. This should be done by the Drawing Officer or by a Gazetted Officer.

(4) It should be arranged, wherever practicable, that disbursements are not made by the clerk who prepares the establishment bills.

Jurisdiction.**NOTIFICATIONS.**

No. 8167Jur.—11th July 1930.—In exercise of the powers conferred by section 6 of the Indian Census Act, 1929 (X of 1929), the Governor in Council proposes to issue the following instructions for the guidance of census officers in all districts within the jurisdiction of the Governor of Bengal including the town of Calcutta. The instructions will be finally issued after consideration of such objections as may be received within one month from the date of issue of this notification.

Every census officer is authorised to ask of all persons within the limits of the local area for which he is appointed such questions as may be necessary to enable him to fill in, in respect of each of such persons, the particulars required by the following form of schedule, but no census officer shall insist upon recording the name of any woman if there is any objection to giving it or ask to see any female who is not voluntarily produced before him or ask for any information not required for the purpose of the census such as the amount of any person's income or the name of any woman's husband.

Instructions to Enumerators.**1.—RULES FOR FILLING UP THE SCHEDULE.**

You must use black ink only and write very clearly.

Column 1 (House Number).—Enter the number of the house. If it is empty, write "*empty*" after the number, and leave one line blank. If you find a house without a number, you will report to the supervisor for orders. For census purposes a house means one or more buildings occupied by one family; that is a number of people living and eating in one mess with their resident dependents such as mother, widowed sisters, younger brothers, etc., and such servants as reside with them. Houses, however, which are at a distance from each other and entirely separate, though belonging to the same commensal family, should be treated as separate.

Column 2 (Serial Number).—This column is not to be filled up until after the final enumeration. You will then enter a serial number for all persons enumerated.

Column 3 (Name).—Enter first the chief resident member of the family, whether male or female, then the other members of the family and their resident servants, if any. The name of the chief resident member of the family is essential, but for others the relationship will do, e.g., "*wife of so and so*," "*guest of so and so*," "*son of so and so*," etc. If an infant has not yet been named, enter the word "*infant*." When you have entered all the persons in a house, you will leave one space blank before making the entries for the next house.

Column 4 (Religion).—Enter here the religion which each person professes, as *Hindu, Muslim, Sikh, Jain, Christian, Buddhist, Parsi* and the sect where necessary. In the case of Christians, the sect must always be entered. In the case of aboriginal tribes who are not Hindus, Musalmans, Christians, etc., the name of the tribe should be entered in this column.

Column 5 (Male or Female).—Enter whether *male* or *female*, even though you have written the word "female" in column 3 already.

Column 6 (Married, etc.).—Enter each person, whether infant, child or adult, as either *married, unmarried* or *widowed*. Divorced persons should be entered as widowed.

Column 7 (Age).—Enter the age as it was or will be on the birthday nearest to the date of final enumeration, *i.e.*, to the nearest approximate number of years. For infants less than six months old enter the word "*infant*."

Column 8 (Caste, tribe or race).—Enter in this column the caste of Hindus as, for instance, *Brahman, Kayastha, Shaha, Teli*, etc., and in the case of wide castes; the subcaste also. For Aryas, Brahmos, Jains and Sikhs enter caste if they recognise caste and tribe if they do not. Enter for Muhammadans the racial group (*Saiyad, Shekh, Mogal, Pathan*) or functional group (*Behra, Jolaha, Kulu*, etc.), which they profess. Enter the tribe of aboriginals as, for instance, *Santhal, Oraon*, etc.,. Enter for Buddhists whether they are *Burmese, Maghs*, etc. For Parsis and other Indians (such as some Christians) who have no caste or race enter "Indian." For other than Indians enter race, *i.e.*, whether they are English, Canadian, French, Anglo-Indian, Goanese, etc.

Column 9 (Earner or dependent).—Enter as *earners* persons who actually work or carry on business, whether personally or by means of servants; or who live on rents, pension, etc.; or who have a share in a coparcenary property or trade or financial concerns and are supported or principally supported thereby. Enter all other persons as "*dependents*." Women and children are ordinarily dependents even if they regularly work or assist the members of their family at their work; but if they regularly get money or any kind of direct return for their work and thereby augment the family income, they are earners.

Column 10 (Principal occupation).—Enter the principal means of livelihood of all earners. Enter the exact occupation and avoid vague terms such as "service" or "writing" or "labour." For example, in the case of labour, say whether in the fields or in a coal mine or jute factory or cotton mill or lac factory or on earth-work, etc. Enter as "*landlords*" those who have land but lease it out and live on the rents in cash or kind and do not actually cultivate either themselves or by servants or hired labourers and distinguish between landlords of agricultural land and of houses or town property. Enter as "*agricultural labourers*" those who cultivate land for hire in cash or kind. Enter all other persons cultivating the land either with their own hands or by servants or hired labourers as "*cultivators*" and distinguish between those who have either a tenure or a permanent lease or occupancy right and those who have no tenure or permanent interest. If a person makes the articles he sells he should be entered as "*maker and seller*"

thereof. Women and children who work at any occupation which helps to augment the family income and have been shown as earners in column 9 must be entered in column 10 under that occupation. Column 10 will be blank for persons entered as "dependents" in column 9.

Column 11 (Subsidiary occupation).—Enter here any occupation which earners pursue at any time of the year in addition to their principal occupation. Thus, if a person lives principally by his earnings as a boatman but partly also by fishing, the word "boatman" will be entered in column 10 and "fisherman" in column 11. If an earner has no additional occupation the column will be left blank. If a person shown in column 9 as dependent has an occupation it will be shown in column 11. Dependents who help to support the family by subsidiary work, *e.g.*, a woman who helps in the fields as well as doing house work, will be shown in column 11.

Column 12 (Industry in which employed).—Enter in this column the industry only in the case of those who exercise the occupation recorded in column 10 or 11 for pay in the employ of a company, firm or individual similarly employing and paying other persons. In other cases leave the column blank. Thus in the case of a person shown as "carpenter" in column 10 or 11 column 12 will be blank unless he is employed and paid wages by some company, firm or individual employing and paying wages also to other persons; but it will contain the entry "furniture-making" or "motor-repairing" or "boat-building" if he is regularly employed by such a concern. Similarly for managers, clerks, operatives or workmen employed in a factory or by any person employing industry enter the name of the industry, *e.g.*, "biscuit-making," "jute-spinning," "jute-weaving," "paper-making," "coal-mining," "tea-growing," "rice-milling," etc.

Column 13 (Birth district).—Enter the district or State in which each person was born; and if the person was not born in Bengal add the name of the province to the district of birth. If the person was born out of India, enter the country as *Nepal, Afghanistan, Ceylon*. The names of villages, tahsils, etc., are not to be given.

Column 14 (Language).—Enter the language which each person ordinarily uses from childhood in his own home. In the case of infants and deaf-mutes the language of the mother should be entered.

Column 15 (Other languages in common or domestic use).—Enter here any other language or languages habitually spoken by each person in daily or domestic life in addition to his mother tongue shown in column 14.

Column 16 (Languages in which literate).—Enter against all persons the name of all current languages which they can both read and write. In the case of persons who cannot read and write any language this column will be blank. Where Hindustani is the spoken language enter "*Urdu*" or "*Hindi*" according to the script in which the language is written.

Column 17 (Literacy in English).—Enter the word “*literate*” against all persons shown as literate who can *both* read and write English. The column will be blank for those who cannot.

Column 18 (Infirmities).—If any person be blind of both eyes (*i.e.*, unable to count the fingers of a hand held up at less than one yard’s distance from him), or insane, or suffering from corrosive leprosy, or deaf and dumb, enter the name of the infirmity in this column.

Do not enter those who are blind of one eye only, or who are suffering from white leprosy only.

II.—PROCEDURE.

A.—The first round (*Preliminary Enumeration*).

1. Beginning from the 1st January 1931 (16th Pous 1337 B.S.), you will visit every house in your block on which a separate number has been affixed, in the order in which the houses are entered in your block list, and fill up the columns in the schedule for all persons who ordinarily live in or take their meals from the house. Even if they are temporarily absent, such person should be entered, if they will be back by the 26th February (14th Falgoon). Visitors should not be entered if they will have left before that date.

2. You must carefully study the instructions given above for filling in the columns of the schedule and also the specimen schedule on the cover of this book, which contains a number of entries illustrating the rules. You should consult your supervisor whenever you are in doubt as to the proper entry.

3. If directed to do so by your supervisor, you will make a rough draft on plain paper, and you will not copy it in your book until it has been passed by him.

4. If the entry for any person in any of the columns of the schedule be the same as that for the person entered on the line above, you must repeat the entry. You must not write the word “*ditto*” or make dots.

5. You must have completed all the entries in your block by the 1st February 1931 (18th Magh 1337 B.S.).

6. Between the 1st and 26th February (18th Magh and 14th Falgoon) you must with special care look out for and report to your supervisor any houses newly erected or newly occupied in your block. You will make entries in the schedule for all persons living in such houses and will get such entries examined and tested by your supervisor.

B.—The second round (*Final Enumeration*).

7. On the evening of the 26th February (14th Falgoon), at the time of lighting lamps, you will take this book as already filled in and again visit every house in your block in order. Before you start on your round you must see that you are yourself enumerated in the house where you are stopping.

8. You must summon the chief member of each family and read over to him one by one the names of the members of his household entered in the schedule, asking him, as you read each name, whether the person is present in the house or not. You must also ask him particularly whether any fresh persons have come or any child has been born. You must strike out the entries for persons who are not present, and fill up the form for any person now in the house who was not there when the first visit was made, such as guests, newly-born infants and others. You are to consider as present all persons living in or taking their meals from the house, even though any of them may be out fishing or watching in the fields or the like.

9. The fresh entries mentioned in the last rule must be made on the blank pages at the end of your book. In each case you will enter the number of the house to which the fresh entries relate, writing under it the word "*continued*."

10. You must make no alteration whatever in any entry against the name of any person unless you have to strike out the entries altogether, because he or she is no longer present. When you strike out a person, you must draw a line completely through all the entries following that person's name, and not merely through column 3.

11. Whilst going on the final round, you must visit every house marked "empty" in your book, to see whether any person is then living there.

12. You must also go to the *dharamsalas*, *sarais*, encampments and landing places, where travellers rest for the night, and enter all particulars in the schedules for the wayfarers, boatmen, pilgrims and others you may find there, and strike out the entries already made against persons who are not then present. You should ascertain from the village watchmen whether any members of a wandering tribe have come to your block. If so, you must go and enumerate them in the manner prescribed above.

13. If any house-holder in your block has been given a separate schedule, you must collect it on the morning of the 27th February (15th Falgoon), and after seeing that columns have been duly filled in according to the rules, you must stitch it into your book, next to the last schedule filled up by you.

14. You will then on the morning of the 27th February (15th Falgoon) go without any delay to the place appointed by your supervisor, and after your book has been inspected by him, you will enter in the abstract printed on the inside of the cover, the number of occupied houses and persons, male and female, in your block.

15. According to the Census Act, every person is legally bound to furnish you with such information as is necessary for filling up the schedule, but you are forbidden to ask for any information not required for the purposes of the census, *as, for instance, the amount of any person's income* or to disclose to any unauthorised person any information given. Any enumerator extorting money on any pretext connected with the census, renders himself liable to punishment under the Census Act or the Penal Code. Entries in the schedules are confidential and cannot be used hereafter in any legal proceedings in the Civil Courts.

H. J. TWYNAM,

IRRIGATION DEPARTMENT.**NOTIFICATIONS.****[Fourth publication.]**

No. 5T.I.—2nd June 1930.—In exercise of the powers conferred on him by sections 78 and 99 of Act III (B.C.) of 1876, the Governor in Council proposes to pass the following rules and fix the undermentioned rates to be charged for water supplied from the Bakreswar Canal in the Birbhum district.

2. Notification No. 2-I., dated the 1st April 1930, on the subject published in the *Calcutta Gazette* in its issue of the 17th April 1930, and three successive issues, is hereby cancelled:—

Leases for a term of years.

1. The country served by the canals shall be mapped out into blocks of convenient size in accordance with the features of the ground, natural or artificial. So far as may be practicable, the blocks shall be separated by drainage lines. This shall be done by the Subdivisional Canal Officer under the guidance and control of the Divisional Canal Officer.

2. Each block determined as above shall be numbered and recorded with its gross and irrigable areas in registers to be maintained by the Subdivisional Canal Officer. The blocks shall also be marked on maps to be maintained by the same officer.

3. Leases for not more than seven years may be granted for the whole irrigable area of a block or for definite parts of a block under the following conditions:—

I.—Ordinarily the whole irrigable area of any village so far as situated within the block must be included in the lease. If the lands of a village within the block are divisible into two or more distinct parts which can be irrigated independently, a separate lease may be granted for each part.

II.—All leases within one block shall be so granted that they may expire on the same date.

III.—No lease shall be granted when the supply of water must of necessity be delivered across an unleased area, unless a channel exists, which in the opinion of the Subdivisional Canal Officer, will deliver water without waste across the unleased area.

4. The Superintending Engineer shall fix from time to time the gross area for which and the limits of the canal within which, leases for a term of years may be granted.

5. Maps of all villages in which lands have been brought under lease for a term of years, or in which there is any probability of such leases being taken, shall be kept in the Subdivisional Canal Office. These maps to be at scale 32"=1 mile when such are available, and elsewhere at scale 16"=1 mile.

6. The preliminary application for a lease for a term of years, either new or renewal, may be of an informal nature, but it must be in writing. It may be presented and shall be received either at the Subdivisional or Sectional Canal Office; in the latter case the Sectional Officer shall forward it immediately to the Subdivisional Canal Officer. The Subdivisional Canal Officer as soon as he has, by

in question constitutes a definite block or a definite part of a block, and that it can be irrigated, shall at once inform the Divisional Canal Officer giving such particulars as that officer may direct, and shall ask his formal approval to the lease being proceeded with. The lands to be brought under lease shall be indicated on a copy of the map alluded to in rule 5.

7. On receipt of such approval the Subdivisional Canal Officer shall depute an amin to prepare the *khasra* or detailed assessment paper. This shall be done on the ground with the aid of the revenue survey map and *khasra* . Should the survey map and *khasra* not be available, the amin shall make a sketch map, and shall measure the areas of the holdings with a chain or measuring-rod.

8. When the amin has completed the *khasra* , the Subdivisional Canal Officer shall forward it to the Divisional Canal Officer for approval.

9. As soon as the *khasra* has been approved by the Divisional Canal Officer, he shall return it to the Subdivisional Canal Officer endorsed with his signature in token of approval.

The Subdivisional Canal Officer shall then prepare a *khatian* or abstract of the *khasra* , and shall have the form of application, given as Appendix No. I to these rules, filled up and signed or marked by each of the applicants, in the presence of two witnesses.

When the application has been completely signed, the Subdivisional Canal Officer shall send it to the Divisional Canal Officer, by whom the permit or formal approval of the lease shall be signed and issued in the form given as Appendix No. III to these rules. The permit shall be made over to the representative of the cultivators by the Subdivisional Canal Officer by means of his Sectional Officer.

10. Should it happen that the cultivators of the block proposed for lease are not unanimous, and that certain of them decline to sign the application, the Subdivisional Canal Officer shall report the matter to the Divisional Canal Officer and shall hold a local enquiry, recording the statements of the persons who decline to sign and recording his personal opinion on the reasons given. He shall then send a report to the Divisional Canal Officer, who shall decide whether the lease may be accepted excluding the fields in the occupation of the persons who decline to sign, or whether the lease shall be declined. The Divisional Canal Officer is authorised to grant a lease when not less than 95 per cent. of the net irrigable area of the block has been signed for. In particular cases should it be desirable to grant a lease even though an area larger than 5 per cent. of the block has not been signed for, this may be done on the written order of the Superintending Engineer. The reasons for granting the lease shall be fully recorded.

Covering Leases.

11. Applicants for a lease for a term of years who may require water before the lease has been concluded can obtain a supply on tendering an application for a covering lease in the form given as Appendix No. II to these rules. This application must be signed in the presence of the tahsildar or of some other responsible officer nominated for the purpose by

the Subdivisional Canal Officer. The signatures should be those of the leading cultivators in the block in question and they should represent holders of not less than 75 per cent. of the irrigable land within the block.

As soon as the Subdivisional Canal Officer receives the application duly signed, he shall issue a permit in the form given as Appendix No. IV to these rules, and shall at once supply water.

Season Leases.

12. Applications for water to irrigate spring rice or other crops between the 16th November and 15th June, may be presented at the Subdivisional Canal Office or to the Sectional Officer. They must be in the form given as Appendix No. V to these rules.

In the applications the areas for which water is required must be specified but the rate will be charged on those areas for which water is actually used as determined by measurement.

The permit in the form given as Appendix No. VI to these rules will be granted by the Subdivisional Canal Officer if he is able to supply the water.

Supply of water.

13. The Divisional Canal Officer shall control the supply of water throughout the Division in his charge.

14. No water shall be supplied to any lands except such as have been brought under a lease for a term of years or for the season, or to such as are provided for by a covering lease.

15. Under the forms of irrigation lease in use, no specific supply of water is promised: but the undertaking is to give such a supply to each lessee as may be necessary for the lands leased. The supply shall be given, as may be required for the proper cultivation of the crops under irrigation, according to the exigencies of the season.

16. The Divisional Canal Officer is empowered to give the required supply by rotation should this be advisable for the efficient working of the canals in his charge. In such a case, he is required to give the lessees written notice informing them of the periods when they will be supplied with water.

Collection of water-rates.

17. The rates due for water supplied shall be collected by the Subdivisional Canal Officer through his staff of tahsildars and peons. All *khatians* or demand statements shall be signed by the Subdivisional Canal Officer after scrutiny in his office.

18. At the time of preparation of the *khatian* in the Subdivisional Canal Officer's office, each person assessed shall be furnished with an extract from the assessment paper, showing the particulars of the charge against him. This extract shall be furnished in such form as may from time to time be approved for the purpose.

19. Each person on paying the sum due from him shall be given a receipt in the form prescribed for the purpose.

20. In regard to any proceedings taken under the Public Demands Recovery Act the Divisional Canal Officer is subject to the control of the Collector of the district.

Unauthorized use of water and waste of water.

21. Should it be necessary to take action under the provisions of sections 79 and 80 of the Act, proceedings shall be instituted only under the direct and special order of the Divisional Canal Officer. The primary record of the facts regarding the unauthorized use or the waste of water shall be made by the Subdivisional Canal Officer and his subordinates. The parties whom it is proposed to assess shall be informed in writing, and shall be called on to show cause why they should not be assessed. The record of their statements shall be made by the Divisional or by the Subdivisional Canal Officer. The Divisional Canal Officer shall consider the facts and statements recorded, and shall in deciding the case give his reasons for or against assessment, both as regards the facts and as regards the law; and he shall determine the rate to be charged, subject to the provision in the schedule of rates attached to these rules.

22. Should the Divisional Canal Officer decide on making an assessment, he shall have the assessment papers prepared by the Subdivisional Canal Officer and his staff. Each person assessed shall be furnished with a statement of the charge against him, and an abstract of the demand or *khatian* shall be sent to the Subdivisional Canal Officer, who shall proceed to recover the sums assessed. The period of one month within which an appeal may be presented to the Collector under section 91 of the Act shall count from the date on which the statement of the charge is furnished to the person assessed, which date shall be endorsed on it.

23. No proceedings shall be instituted if the unauthorized use or the waste of water have occurred through the act or neglect of a Canal Officer or subordinate employed on the canal. During the irrigation of autumn rice, the passing on of surplus water from leased to unleased fields is not an unauthorized use of water.

Complaints and Applications.

24. All complaints or applications with respect to the supply of water, to defective drainage, and generally with respect to the administration of the canal, shall be received on presentation at either Divisional or Subdivisional Canal Offices.

Complaints and applications received by a Divisional Canal Officer may be transferred to his Subdivisional Canal Officers for disposal at his discretion.

25. Complaints or applications with respect to corrections of the assessment, with respect to the actions of the amins in assessing, and with respect to the actions of the tahsildars and other staff employed in collections, shall be received at the office of the Divisional Canal Officer.

26. Receipts in the prescribed form shall be given at all offices for complaints or applications presented. The receipt of all complaints and applications shall be recorded in registers to be kept for that purpose.

27. The officer receiving the complaint or application shall either make a personal enquiry into the matter or he shall nominate in writing some responsible person to hold the enquiry.

28. The orders passed on all complaints or applications shall be in writing and a copy of every order shall be furnished to the complainant or applicant.

The copy of order may be sent by post (registered), if this is convenient.

The period within which an appeal may be presented under section 91 of the Act shall be reckoned from the date on which the copy of the order is received by the person.

29. When an appeal to the Collector is from the order of a Subdivisional Canal Officer, the proceedings shall be called for through the Divisional Canal Officer, who may record on them such remarks as he may think desirable, provided that he does not thereby detain the proceedings.

In all cases in which an appeal against an assessment is preferred to the Collector, that officer may, if he thinks fit, direct that the collection of water-rates be suspended till the appeal is heard.

30. The Divisional Canal Officer is empowered to revise the proceedings of his Subdivisional Canal Officers, and the Superintending Engineer is empowered to call for and to revise the proceedings of all officers under his control.

Remissions and Alterations of Demand.

31. Whenever the crop on land entitled to a supply of water suffers material injury from an insufficient supply of water, or from any interruption in the supply of water, remission of the rate due on such crop shall be given in whole or in part by the Divisional Canal Officer, provided that the person claiming remission shall have applied for such not less than 15 days before the reaping of the crop.

32. On the occasion of lands being brought under a lease for a term of years, the Divisional Canal Officer is empowered to remit the rates for the first season on those fields which from the nature of the cultivation then obtaining, or from other causes, have not, in that season, derived any benefit from the supply of canal water.

33. Should the crop on lands under lease for a term of years suffer material injury from excess of water due to deficient drainage the Divisional Canal Officer may grant remission of the rates due on such lands in whole or in part, provided that the person asking for remission shall have applied at least 15 days before the reaping of the crop.

34. Revisions of the assessment required in consequence of land under lease being left uncultivated or of land being appropriated for purposes other than cultivation shall be made under the orders of the Divisional Canal Officer.

35. Revisions of the assessment required in consequence of incorrect entries of the names of occupants of lands under lease or of incorrect entries of areas or amounts in the assessment papers, or required by changes in the occupation of lands shall be made under the orders of the Divisional Canal Officer.

36. Remissions of water-rates on account of injury to the crops caused by inundation, by blight, by storms or by any extraordinary cause will only be allowed under the special orders of the Local Government.

Irrecoverable Demands.

37. The Superintending Engineer is empowered to sanction the write-off of those demands which are reported, after due enquiry by the Divisional Canal Officer, as irrecoverable owing to the poverty of the defaulter or of his successors in case of his death, or owing to the defaulter having absconded.

Cultivators' Representatives.

38. Whenever the preliminary application for a lease for a term of years has been approved by the Divisional Canal Officer, the Subdivisional Canal Officer shall select as representative of the cultivators a suitable person or persons who shall generally be acceptable to the cultivators and who shall each have a direct interest in the land for which the lease is executed.

39. The person or persons so selected shall be required to give assistance to the Canal Officers in respect of the following matters:—

(i) In the preparation of applications for leases.

(ii) In the measurement of irrigated lands.

(iii) In recording the names of the occupiers of the holdings.

(iv) In receiving demand statements and distributing to the cultivator the individual notices of assessment.

(v) In attending, when required, at enquiries into complaints.

(vi) In reporting to the Subdivisional Canal Officer any changes in the occupancy of lands under lease.

(vii) In assisting the tahsildar in collecting rates.

40. For such assistance the cultivators' representative or representatives shall be entitled to free irrigation of the lands in his or in their own occupation which may lie within the boundaries of the leased area, subject to a total limit of 3 per cent. of the area assessed. The Divisional Canal Officer may disallow in whole or in part this free irrigation, and may recover the rates which would otherwise have been payable in whole or in part if the assistance specified in rule 39 has not been efficiently rendered. The reasons for such disallowance shall be recorded in writing.

41. The Subdivisional Canal Officer shall maintain in his office a register containing a record of the names of all representatives and of the areas of free irrigation allowed to each.

42. Applicants for season leases shall be required to nominate one of their number who must have a substantial interest in the land to be irrigated as their representative. The representative so nominated shall perform the same duties as stated in rule 39 and shall receive remuneration on the same scale as in rule 40.

Power to decline or cancel leases.

43. Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted or used for the irrigation of lands not under lease, it shall be competent for the Superintending Engineer to direct that the lease shall be cancelled with

effect from the 16th of June next following. The order to cancel a lease shall be passed before the 1st of April of the year in which it is to take effect.

44. The Superintending Engineer may give directions to the Divisional Canal Officer to decline applications for irrigation leases of lands in villages where there has been persistent difficulty in realizing the water-rates, until all arrears have been paid.

He may further suspend, or altogether cancel, any lease for a term of years, if on the 1st June of any year water-rates to the extent of half the demand for one year are in arrears. Previous notice of intention to put this rule in force shall be given not later than the 15th April preceding.

Miscellaneous.

45. Tanks may be supplied with canal-water without charge, when water can be made available without injury to the cultivation dependent on a canal, under the following conditions:—

(i) That the water is to be exclusively used for domestic purposes, or for watering cattle.

(ii) That a channel exists through which water can pass without waste.

(iii) That the water shall only be supplied on the written order of the Subdivisional Canal Officer.

(iv) That any new outlet or sluice which may be required to allow of the supply being given shall be provided at the cost of the persons who ask for the water.

(v) That the supply of water may be stopped at any time if it is found that it is being misused.

46. Except when a public right-of-way exists, no person shall, without the permission expressed in writing of the Divisional or Subdivisional Canal Officer, pass himself, or cause any animal or vehicle to pass, on or across any of the works, banks or channels of a canal, or drainage work which is part of the canal system except by means of such bridges, fords and ferries as may have been provided for the purpose.

Any person who, after due warning, commits a breach of this rule, may be proceeded against under section 93, clause (9), of the Irrigation Act.

47. The use of any part of the banks or berms of any canal, drainage work which is part of the canal system, or flood embankment which is subject to the provisions of the Irrigation Act, as a place for relieving the calls of nature, is prohibited. Any person who after due warning commits a breach of this rule may be proceeded against under section 93, clause (9), of the Irrigation Act.

48. Should water be required for purposes other than irrigation, it may be supplied when available at a rate of one rupee per 10,000 cubic feet of water.

49. No officer employed on the canals, unless especially exempted by the Governor in Council from the operation of this rule, shall have any interest in the distribution of water from any of the canals or purchase or bid for any Government property sold thereon either in his own name or in the name of another, or jointly, or in shares with others.

Holds that the salvation of India depends upon the revival of her cultural swaraj necessitating her people's halting on the path of Western civilization, if not retracing their steps to some extent, discusses the possibilities of the revival of cultural swaraj and suggests various means (such as co-operative movement, social reform, propagation of ancient culture, the promoting of the virtues of benevolence, self-abnegation and renunciation, practice of Brahmacharyya, etc.) for the revival.] Pages 1 | 290. CALCUTTA, the 18th July 1930.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 11th July 1930.

Monthly Weather and Crop Report of Bengal for June 1930.

I. Character of the season.—During the month under review, the rainfall was average in eleven districts, while elsewhere it was in defect. The usual rainfall statement is appended.

II. Progress of agricultural operations.—Preparation of lands for winter paddy and sowing of the same in nurseries continued under favourable conditions on the whole. Heavy rain in East Bengal checked the growth of highland jute, but more rain was still needed for preliminary operations in parts of West Bengal. Transplantation of paddy was reported to have commenced in some districts before the middle of the month. Weeding of autumn paddy was almost completed in East and North Bengal, while in West Bengal the operation still continued. Harvesting of lowland jute commenced in parts of East Bengal during the month.

III. State of standing crops.—The condition of standing crops was reported to be generally satisfactory.

IV. Prospects and probable outturn.—The outturn of autumn paddy is expected to be very satisfactory except in some East Bengal districts where heavy rain and flood affected the crop to a small extent. The prospects of sugarcane and deep water paddy are reported to be generally promising.

V. Damage to standing crops.—No damage to standing crops was reported from any part of the province, except from parts of Birbhum where locusts caused damage to paddy seedlings in the third week of the month.

VI. Condition of agricultural stock.—The condition of live-stock was reported to be generally fair. Sporadic cases of cattle-disease, however, were reported from the districts of the Presidency and from the States of Cooch Behar and Tripura.

VII. Failure of pasturage and fodder.—The supply of fodder was reported to be sufficient throughout the Presidency, except in the last part of the month from parts of the Tripura State.

VIII. Prices of food-grains.—During the second fortnight of the month, the retail price of common rice of the cheapest quality rose in four districts, fell in five and remained stationary in the rest of the Presidency. The prices varied from 9½ seers per rupee in Howrah to 5 seers in the 24 Parganas.

IX. Condition of agricultural population.—The condition of agricultural population continued to be fair on the whole.

ROBERT S. FINLOW,

Director of Agriculture, Bengal.

PRELIMINARY FORECAST OF THE JUTE CROP, 1930.

Consolidated Statement for Bengal, Bihar and Orissa and Assam.

[This Forecast deals with estimates of areas only. Estimates of outturn are dealt with in the Final Forecast.]

Revision of area for 1929.—It has been found advisable to increase the area published in the final forecast for 1929 by roughly 100,000 acres, the revised figure being 3,414,965 acres as against 3,316,605 acres.

Area in 1930.—The estimated area of jute in the three provinces is 3,506,700 acres, an increase of 91,700 acres, or about 2·7 per cent. as compared with the revised total for 1929.

The consolidated figures are as follows: —

DEPARTMENT OF AGRICULTURE, BENGAL.

PRELIMINARY FORECAST OF THE JUTE CROP OF BENGAL, 1930.

[NOTE.— On an average of the five years ending 1927-28, the area under jute in Bengal, to which this Forecast relates, represents some 86·1 per cent. of the total area under jute in British India.]

The Preliminary Forecast deals only with the estimates of area sown and the condition of the crop at the time of publication of the forecast. The estimates of area are based on information received through the Collectors from the Revenue staff; also from Panchayets and Agricultural Officers.

Revision of area.—It has been found advisable to increase the area published in the Final Forecast for 1929 by roughly 74,000 acres, or about 2·4 per cent.

Area sown in 1930.—In Bengal, returns for the present season shew a total area of 3,062,300 acres, an increase of about 42,000 acres, or 1·4 per cent. as compared with the revised figures for 1929.

Character of the season.—Up to date, excepting in small areas in the Presidency and Rajshahi Divisions, where sowings were retarded by drought, weather conditions have been favourable throughout the jute-growing tract. The very gradual rise of the rivers has also helped the lowland crop.

Present state of the crop.—The present state of the crop may be regarded as having been exceptionally good up to the middle of June. Latterly heavy rain has checked growth in parts of Eastern Bengal, but the outlook is still favourable, on the whole.

Stock.—Stocks of fibre from last year's crop are reported to be considerable.

Director of Agriculture, Bengal.

DEPARTMENT OF AGRICULTURE, BIHAR AND ORISSA.

PRELIMINARY FORECAST OF THE JUTE CROP OF BIHAR AND ORISSA, 1930.

[NOTE. On an average of the five years ending 1927-28, the area under jute to which Bihar and Orissa Forecast relates, represents about 8.0 per cent. of the total area under jute in British India.]

The present Forecast deals only with the estimated area sown. It gives also a general survey of prospects, but makes no reference to the probable outturn either in percentage figures or in bales.

2. **Acreage.**—I estimate the area sown during the current and four preceding years in round numbers as follows:—

Year.	Acreage.
1926	297,000
1927	241,000
1928	247,000
1929	238,000*
1930	238,000

3. **Weather conditions.**—In March light showers fell in the jute districts. The fall was above the normal in Champaran, Muzaffarpur, Darbhanga, Bhagalpur and Purnea, and below the normal in the remaining three jute districts. In April and May light rain fell in all the jute districts. The fall was below the normal everywhere. In June rain fell in all the jute districts; the fall was light to moderate everywhere. The weather conditions are reported to be favourable except in Purnea and the Santal Parganas. Sowings are still going on in Purnea, Cuttack and Balasore.

4. **District returns.**—Last year's area under jute was finally estimated at 231,400 acres, but recent enquiries show that this estimate is still lower than the mark and that last year's area was not less than 238,000 acres and the latter acreage therefore has been shown this year. The total area under jute this year is estimated by District Officers in round figures at 176,100 acres, and in my opinion this is highly under estimated and this year's figure is likely to be not less than 238,000 acres which is the revised estimate for last year.

5. **Condition and prospects.**—The condition of the crop is fair.

6. **General.**—The quantity of jute which remains in the jute districts from the crops of 1929 is reported to be small except in parts of Purnea.

The statement below compares the estimated area under jute in this province this year with the preliminary and final figures of last year:—

The sowing is still continuing in some places. The crop of this year is expected to be about the same as the year except in Kishanganj, where it is expected to be less. The decrease in area under the crop is due to late rainfall and the low price the jute of last year fetched.

DEPARTMENT OF AGRICULTURE, ASSAM.

PRELIMINARY FORECAST OF THE JUTE CROP OF ASSAM, 1930.

[NOTE.—On the average of the five years ending 1927-28, the area under jute in Assam represents 4·7 per cent. of the total area under jute in British India.]

Character of the season.—The weather has been on the whole favourable for the cultivation and growth of the crop. Slight damage has however been done by hailstorms in the Goalpara and Nowgong districts. The present condition of the crop appears to be good and prospects are better than last year in all districts except Sibsagar where the outturn is expected to be below normal.

2. Area sown.—The total area under jute as estimated by the Deputy Commissioners is 206,400 acres against the final area of 156,600 acres of last year. There is increase in area in all districts except Kamrup and it is due to favourable weather condition at the sowing time.

3. Stock.—According to the reports of the Deputy Commissioners, a little jute remains in stock from last year's crop in Goalpara, Kamrup and Darrang, but the Deputy Commissioner, Nowgong, reports a rather considerable stock in hand.

Preliminary forecast of the jute crop of Assam, 1930.

District.	Area under jute.			Difference between the figures now estimated for 1930 and the final of 1929.		Whether much, little or no jute remains in the district from the crop of 1929.	Date by which the sowing of the crop generally commenced this year and whether that date was early, normal or late.	Remarks by the Deputy Commissioners.

1	2	3	4	5	6	7	8	9
	Acres.	Acres.	Acres.	Acres.	Acres.			
Cachar ..	300	200	400	200	..	No ..	Beginning of April. Normal.	The increase in area is due to favourable weather at sowing time. Till now the condition of the crop is good and the outturn is expected to be better than last year.
Sylhet ..	20,000	5,700	21,600	15,900	..	No ..	Beginning of March. Early.	The increase in area is due to failure of last year's crop resulting in widespread distress in the district from which people have sought early relief by extensive jute cultivation to make good their loss. The weather is favourable for the crop and a better outturn than last year is expected.
Goalpara ..	60,000	58,400	84,800	26,400	..	Little ..	First part of April. Normal.	The increase in area is due partly to the extension of cultivation and partly to favourable weather at the sowing time. The effect of weather on the crop has been good for the growth, although slight damage was done by hailstorm in some places. The present condition of the crop is good and a better outturn than last year is expected.
Kamrup ..	15,000	19,800	17,700	..	2,100	Little ..	Beginning of April. Normal.	The decrease in area as compared with the last year's actual is due partly to ordinary fluctuations and partly to the fact that more land has been occupied for growing autumn rice. The weather has been favourable for the cultivation and growth of the crop and the outturn is expected to be better than last year.
Darrang ..	12,000	17,300	18,600	1,300	..	Little ..	Middle of April. Normal.	The increase in area is due to extension of cultivation. The weather has been favourable for the crop and a better outturn than last year is expected.
Nowgong ..	40,000	49,000	50,600	7,600	..	Considerable quantity remains.	First week of March. Early.	The favourable weather at the sowing time accounts for the increase in area. The present condition of the crop is good and the outturn is likely to be better than last year. A little damage to the crop was done by the hailstorm.
Sibsagar ..	300	400	400	..	..	No ..	Middle of April. Normal.	The weather on the whole was not quite favourable on account of continuous rain at the sowing time. Till now the weather remains almost to be the same and so the outturn is expected to be below normal.
Lakhimpur ..	200	1,100	1,200	100	..	No ..	First week of April. Normal.	The increase in area is due to extension of cultivation. The weather has been generally favourable for the crop, although heavy rains in the middle of April interfered with the sowing operation. The present condition of the crop appears to be good and a better outturn than last year is expected.
Garó Hills (Plains)	3,300	4,700	5,100	400	..	No ..	Middle of March. Normal.	Favourable weather accounts for the increase in area. The weather till now is favourable and the condition of the crop is good. The outturn is expected to be better than last year.
Total ..	151,700	156,600	208,400	51,900	2,100

No. 12I.—22nd July 1930.—The following draft of rules and schedule of rates of tolls, which, in exercise of the power conferred by sections 6 and 11 of the Canals Act, 1864 (Bengal Act V of 1864), the Governor in Council intends to make for the Roypasa-Bheduria khal, commonly called the Roypasa

khal, joining Kalijira river at the north, Karapur Bagadi in the west and Nathullabad khal leading to Barisal at Dephulia and Haripasa in the east, in the district of Bakarganj, is hereby published for the information of persons likely to be affected thereby.

11. The draft will be taken into consideration on or after the 12th September 1930, and any objections or suggestions received by the undersigned before that date will be considered:—

Draft rules and schedules of rates of tolls.

1. Every vessel on entering the channel and before passing the gate at either end or even when entering the channel from a side khal between the gates shall be liable to measurement for the purpose of ascertaining the tolls payable; in case of any reasonable doubt arising, a vessel may be measured again by any person appointed by the District Board of Bakarganj on this behalf.

2. Vessels for the purpose of the determination of maundage shall be divided into two classes as below:—

Class I.—To include all vessels of the types of country boats, including saltees and hapors (fish cages), house boats, kosh boats, green boats, etc.

Class II. To include steam boats, motor boats, flats and barges and other square-built vessels.

3. The maundage of every vessel, whether laden or empty, shall, for the purpose of Act V (B. C.) of 1864 and of these rules, be determined by the following measurements:—

CLASS I.

A. The product of one quarter the length of the vessel from stem to stern measured along the water-line, multiplied by the interior greatest breadth of the vessel, multiplied by the depth from the water-line to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

B. The measurement of the length is to be made in feet, rejecting inches, the measurement of breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

C. The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of $12\frac{1}{2}$ maunds, any remainder of less than $12\frac{1}{2}$ maunds being rejected. In the case of vessels exceeding 500 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 50 maunds, rejecting any remainder of less than 50 maunds.

D. **Saltees.**—The product of one quarter of the inside length of the vessel, measured along the centre line from stem to stern, multiplied by the interior greatest breadth of the vessel, multiplied by the greatest depth measured from the top to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

CLASS II.

For vessels of class II the number of maunds obtained by the system of measurement prescribed for vessels of class I shall be increased by one-half. For vessels of this class above 5,000 maunds measurement, the maundage shall be reckoned to the nearest integral multiple of 500 maunds, rejecting any remainder of less than 500 maunds. In the case of steamers and motor boats the maundage determined as above shall be reduced by one-third as an allowance of engine space.

For vessels of class II which are furnished with reliable way bills, the gross maundage of cargo shown by the way bills or in the case of steamers, the maundage obtained from multiplying the registered tonnage of the steamer by 27, may, at the option of the employer of the vessel or the steamer (as the case may be), be taken as the maundage on which tolls will be charged.

4. After the measurement the person in charge of the vessel shall be provided with a slip showing the maundage to be charged, which must be presented at the toll office where he will be provided with a ticket, after payment of toll, which will permit the vessel to pass the gate or proceed through the channel.

5. Every ticket shall have entered on it the name of the sarang, manjee or other person in charge of the vessel, the date of entry, the maundage, the cargo, the amount of toll charged and the number of days for which the ticket remains current.

6. All tolls are payable on demand and shall be paid at the toll office before a vessel is permitted to proceed.

7. The ticket must be kept on board the vessel and in possession of the person in charge of the vessel and must be produced for inspection when demanded by the person authorised to collect tolls, or by any officer to whom such person is subordinate. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in rules 3 and 12 and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel shall be liable to seizure and detention under the provisions of section 9 of the Act.

8. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the collector of tolls on payment of a fee equal to one quarter of the total tollage, subject to a minimum fee of one anna per ticket.

9. All vessels, whether the property of Government, District Board, other local bodies or of private persons, are liable for toll except those specially exempted under these rules or by a resolution passed by the District Board of Bakarganj from time to time.

10. The canal may be closed once a year for effecting the necessary repairs to it on seven days' notice of the intention so to close it being given; but in the event of any sudden emergency the canal may be closed at any time without prior notice, and no claim in such case by owners of vessels or others for compensation on account of detention shall be entertained.

11. No rafts exceeding 50 feet in length and 5 feet in breadth shall be permitted to enter the canals.

12. The rates of toll shall be as follows:—

- (1) On all vessels empty or laden, per hundred maunds—Twelve annas.
- (2) On all vessels empty or laden, for 12½ maunds or less—One anna six pies.
- (3) On rafts of bamboos, grass, timber, etc., not exceeding 50 feet in length and 5 feet in breadth—Six annas each raft.

Tolls will be levied at Dephulia, near Baniakati bridge.

13. For boats frequently using the canal, such as boats carrying passengers, grass or perishable articles monthly tickets will be issued at 10 times the ordinary toll.

14. Every vessel which has paid toll shall be allowed to remain in the canal for three days inclusive of the days of entry into and leaving the canal. A vessel remaining in any part of the canal longer than three days shall be charged demurrage equal to one-half of the toll for each day in excess of three days. No vessel shall be permitted to remain in the canal for more than one month. Provided that this rule shall not apply to vessels holding monthly tickets under rule 13 above, which may remain in the canal for more than three days without payment of demurrage but not for more than one month at a time.

15. No vessel carrying exclusively police officers or servants, soldiers and officers of the British Army, post mail runners, officers of the Irrigation Department on duty, officers and servants of the toll office for the canal referred to in these rules while on duty, or the vessels of such other persons as may be exempted by a resolution of the District Board of Bakarganj, shall be liable for toll in the canal.

16. Any matter relating to the mode of collection of tolls and other relevant points, not provided for in these rules, shall be decided by the District Board of Bakarganj at a meeting, and shall be subject to the approval of the local Government.

REVENUE ACCOUNT.

RECEIPTS.—The total receipts for the year are Rs. 51.82 lakhs against a budget estimate of Rs. 44.27 lakhs. The increase of Rs. 7.55 lakhs is distributed over almost all of the revenue heads of income appearing in the budget.

EXPENDITURE.—The expenditure for the year was Rs. 29.30 lakhs against a budget provision of Rs. 31.38 lakhs. The reduction in expenditure of Rs. 2.09 lakhs is principally due to a gain in exchange in remitting the interest on sterling debenture loans, and reduced expenditure on stamp duty and establishment charges.

To the total revenue expenditure of Rs. 29.30 lakhs there remains to be added a sum of Rs. 1.31 lakhs representing the depreciation on a valuation of the Trust investments in Government securities, etc., made at 31st March 1929.

The closing balance on revenue account shows a surplus of Rs. 3,87,86,362.0-2 of which a sum of Rs. 3,13,42,883.9-5 has been spent on capital account to meet expenditure in excess of capital receipts. The net balance Rs. 74,43,478.6-9 was held as follows:—

**RESOLUTION ON THE REPORT OF
THE ADMINISTRATION OF THE
JAILS DEPARTMENT, BENGAL,
1929.**

POLITICAL DEPARTMENT.

Jails.

CALCUTTA, THE 25TH JULY 1930.

RESOLUTION—No 3376P.J.

Read—

The Report on the Administration of the Jails Department of the Presidency of Bengal for the year 1929.

Read also—

The Reports for the years 1927 and 1928 and resolutions of Government thereon.

1. The average jail population in the jails of Bengal rose to 14,477, thus maintaining the somewhat noticeable increase remarked in the three preceding years. The average number of male convicts per diem was 14,325 and of females 152. The number of admissions during the year was 77,981 as against 74,774 in the preceding year, of whom 130 were young persons of less than 16 years of age. Government agree with the Inspector-General that the appreciable rise in the admission of juvenile prisoners to ordinary criminal jails is to be deplored. An unsatisfactory feature, and one to which Government have on previous occasions drawn the attention of Magistrates, is the fact that 28 per cent. of convicts received sentences not exceeding one month, while a further 25 per cent. received sentences not exceeding three months. The number of reconvicted prisoners admitted showed, however, a slight decrease.

2. The Governor in Council observes with pleasure the continuance of the progressive improvement in the death-rate of prisoners. In the year under review this fell to 12.2 per mille, which is the lowest figure on record in this province. This figure is an indication of the skill and care exercised by Superintendents and their staff, particularly the medical staff, and is likewise a satisfactory comment upon the rules laid down for the diet and treatment of prisoners in the jails of this Presidency.

3. The total cost of guarding and maintaining the prisoners shows a slight increase, the decrease in dietary charges being more than counterbalanced by the larger expenditure on establishment consequent upon the increased rates of pay granted to head warders and warders and certain additions to the staff in central jails.

4. Although the daily average prison population was higher, the daily average number of convicts under sentence of labour decreased.

5. The total earnings of the manufacturing departments of the jails showed a slight increase from Rs. 4,17,555 in 1928 to Rs. 4,19,250 in 1929. Steps have recently been taken with a view to securing that the other departments of Government are not only aware of the articles which the Jails Department manufacture and the rates at which they are able to supply them, but shall place with the Jails Department their orders for such articles as a matter of course.

6. The average period of detention of prisoners awaiting trial shows a regrettable increase. The total average for Sessions cases being 56 days as against 45 of the preceding year, and in cases other than Sessions cases 25 as against 21 of the preceding year. The figures for the districts of Krishnagar, Dacca, Rajshahi, Bogra, Pabna and Faridpur are particularly deplorable in respect of Sessions cases, while in other cases Dacca, Berhampore and Chittagong are noticeable. The attention of the Judicial Department will again be drawn to these delays.

7. The increased rates of pay granted to the warder staff have encouraged the men to remain in the service and have contributed to the decrease in loss of efficiency due to sickness. Before any marked improvement in the general standard of their work can be expected to appear, arrangements, now unhappily held up for lack of funds, must be made for affording them suitable training in their difficult duties when they join the force.

8. The Governor in Council notices with pleasure the success of the efforts to provide primary education for young prisoners in the Alipore Central Jail where the scheme has now been sanctioned as a permanent measure. It is hoped that primary education will soon be introduced in the other four central jails with equally successful results. The

importance to the control of crime in the province of according correct treatment to young offenders cannot be over-estimated, and the very interesting and encouraging account which the Inspector-General is able to give of the development of the Borstal School at Bankura should not only lead the Courts to study the possibilities of the Act and make a discriminating use of the institution, but should attract and hold the interest and active support of all persons who desire to assist in the conversion of potential criminals into useful and productive citizens. The Borstal School can do much for young persons committed to it, but its efforts will go in vain unless the public at large recognise that they and they alone can ensure the ultimate success of its work by the practical help and sympathy which they extend to the boys on return to normal life, and by actively participating in the work of the After-care Associations which are assisting their return to society. The Governor in Council again desires to place on record his appreciation of the services of those non-official gentlemen who have shown a practical interest in this work.

9. The effective separation of different classes of prisoners is as important to the prevention of crime as it is difficult to ensure. During the year under review arrangements were completed for converting the Presidency Jail into a special jail for the confinement of habitual offenders and recidivists, and it is hoped that this step may prove to be the first of others in this direction. Contamination does not, however, take place only after conviction. The accommodation for undertrial prisoners has long ceased to be sufficiently spacious to admit of the segregation of known offenders from other persons awaiting trial, and the problem can only be solved by extensive new building projects entailing considerable expenditure.

10. The inadequacy of the provision for the accommodation of lunatics in this Presidency continues to lead to the

incarceration of prisoners in criminal jails who ought to be receiving proper treatment in institutions devoted to the purpose.

11. The number of offences committed by prisoners in jail again shows a decrease although the daily average population has risen. The number of prisoners punished with whipping was 9 as against 5 in the preceding year. In 21 jails out of 25 there was no punishment of whipping.

12. The Governor in Council regrets that financial difficulties have prevented more rapid progress in the introduction of those reforms recommended by the Jails Committees. With the means at his disposal Colonel Simpson and the staff of his department have not spared themselves in the effort to ensure that everything possible was done to minimise the effect of financial stringency on the solution of the difficult problems with which they are faced in this Presidency. Mention was made in the resolution of last year of the distinguished services rendered by Lieutenant-Colonel Hamilton who has since retired from the service, and the Governor in Council desires to reiterate his sense of the loss which the department has suffered by his departure. He also desires to acknowledge the good work done during the year 1929 by the officers specially mentioned in Colonel Simpson's interesting report.

Order---Ordered that a copy of this resolution be forwarded to the Inspector-General of Prisons, Bengal, for information and guidance.

Ordered that a copy of this resolution and a copy of the report be submitted to the Government of India in the Home Department.

Ordered also that the resolution be published in the *Calcutta Gazette*.

By order of the Governor in Council,

W. S. HOPKINS,
Chief Secy. to the Govt. of Bengal.

NOTIFICATIONS.

[Second publication.]

No. 121.- 22nd July 1930.—The following draft of rules and schedule of rates of tolls, which, in exercise of the power conferred by sections 6 and 11 of the Canals Act, 1864 (Bengal Act V of 1864), the Governor in Council intends to make for the Roypasa-Bheduria khal, commonly called the Roypasa khal, joining Kalijira river at the north, Karapur Bagadi in the west and Nathullabad khal leading to Barisal at Dephulia and Haripasa in the east, in the district of Bakarganj, is hereby published for the information of persons likely to be affected thereby.

II. The draft will be taken into consideration on or after the 12th September 1930, and any objections or suggestions received by the undersigned before that date will be considered:—

Draft rules and schedules of rates of tolls.

1. Every vessel on entering the channel and before passing the gate at either end or even when entering the channel from a side khal between the gates shall be liable to measurement for the purpose of ascertaining the tolls payable; in case of any reasonable doubt arising, a vessel may be measured again by any person appointed by the District Board of Bakarganj on this behalf.

2. Vessels for the purpose of the determination of maundage shall be divided into two classes as below:—

Class I.—To include all vessels of the types of country boats, including saltees and hoppers (fish cages), house boats, kosh boats, green boats, etc.

Class II.—To include steam boats, motor boats, flats and barges and other square-built vessels.

3. The maundage of every vessel, whether laden or empty, shall, for the purpose of Act V (B. C.) of 1864 and of these rules, be determined by the following measurements:—

CLASS I.

A. The product of one quarter the length of the vessel from stem to stern measured along the water-line, multiplied by the interior greatest breadth of the vessel, multiplied by

the depth from the water-line to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

B. The measurement of the length is to be made in feet, rejecting inches, the measurement of breadth and depth is to be made in feet and quarters of a foot, rejecting any remainder of less than a quarter of a foot.

C. The maundage on which the amount of toll is calculated shall be reckoned to the nearest integral multiple of $12\frac{1}{2}$ maunds, any remainder of less than $12\frac{1}{2}$ maunds being rejected. In the case of vessels exceeding 500 maunds by measurement, the maundage shall be reckoned to the nearest integral multiple of 50 maunds, rejecting any remainder of less than 50 maunds.

D. **Saltees.**—The product of one quarter of the inside length of the vessel, measured along the centre line from stem to stern, multiplied by the interior greatest breadth of the vessel, multiplied by the greatest depth measured from the top to the interior bottom of the vessel, is to be taken as equal to the number of maunds upon which tolls shall be levied.

CLASS II.

For vessels of class II the number of maunds obtained by the system of measurement prescribed for vessels of class I shall be increased by one-half. For vessels of this class above 5,000 maunds measurement, the maundage shall be reckoned to the nearest integral multiple of 500 maunds, rejecting any remainder of less than 500 maunds. In the case of steamers and motor boats the maundage determined as above shall be reduced by one-third as an allowance of engine space.

For vessels of class II which are furnished with reliable way bills, the gross maundage of cargo shown by the way bills or in the case of steamers, the maundage obtained from multiplying the registered tonnage of the steamer by 27, may, at the option of the employer of the vessel or the steamer (as the case may be), be taken as the maundage on which tolls will be charged.

4. After the measurement the person in charge of the vessel shall be provided with a slip showing the maundage to be charged, which must be presented at the toll office where he will be provided with a ticket, after payment of toll, which will permit the vessel to pass the gate or proceed through the channel.

5. Every ticket shall have entered on it the name of the sarang, manjee or other person in charge of the vessel, the date of entry, the maundage, the cargo, the amount of toll charged and the number of days for which the ticket remains current.

6. All tolls are payable on demand and shall be paid at the toll office before a vessel is permitted to proceed.

7. The ticket must be kept on board the vessel and in possession of the person in charge of the vessel and must be produced for inspection when demanded by the person authorised to collect tolls, or by any officer to whom such person is subordinate. If on demand the ticket is not produced, such person or officer shall assess the tollage as provided in rules 3 and 12 and shall require payment of toll, and unless and until the toll is paid, or the original ticket or a duplicate is produced as evidence that toll has already been paid, the vessel shall be liable to seizure and detention under the provisions of section 9 of the Act.

8. Duplicates of lost tickets, of which the numbers and dates can be satisfactorily established, will be granted by the collector of tolls on payment of a fee equal to one quarter of the total tollage, subject to a minimum fee of one anna per ticket.

9. All vessels, whether the property of Government, District Board, other local bodies or of private persons, are liable for toll except those specially exempted under these rules or by a resolution passed by the District Board of Bakarganj from time to time.

10. The canal may be closed once a year for effecting the necessary repairs to it on seven days' notice of the intention so to close it being given; but in the event of any sudden emergency the canal may be closed at any time without prior notice, and no claim in such case by owners of vessels or others for compensation on account of detention shall be entertained.

11. No rafts exceeding 50 feet in length and 5 feet in breadth shall be permitted to enter the canals.

12. The rates of toll shall be as follows:—

- (1) On all vessels empty or laden, per hundred maunds—Twelve annas.
- (2) On all vessels empty or laden, for 12½ maunds or less—One anna six pies.
- (3) On rafts of bamboos, grass, timber, etc., not exceeding 50 feet in length and 5 feet in breadth—Six annas each raft.

Tolls will be levied at Dephulia, near Baniakati bridge.

13. For boats frequently using the canal, such as boats carrying passengers, grass or perishable articles monthly tickets will be issued at 10 times the ordinary toll.

14. Every vessel which has paid toll shall be allowed to remain in the canal for three days inclusive of the days of entry into and leaving the canal. A vessel remaining in any part of the canal longer than three days shall be charged demurrage equal to one-half of the toll for each day in excess of three days. No vessel shall be permitted to remain in the canal for more than one month. Provided that this

rule shall not apply to vessels holding monthly tickets under rule 13 above, which may remain in the canal for more than three days without payment of demurrage but not for more than one month at a time.

15. No vessel carrying exclusively police officers or servants, soldiers and officers of the British Army, post mail runners, officers of the Irrigation Department on duty, officers and servants of the toll office for the canal referred to in these rules while on duty, or the vessels of such other persons as may be exempted by a resolution of the District Board of Bakarganj, shall be liable for toll in the canal.

16. Any matter relating to the mode of collection of tolls and other relevant points, not provided for in these rules, shall be decided by the District Board of Bakarganj at a meeting, and shall be subject to the approval of the local Government.
